With the development of molecular marker technology in the 1980s, the fate of plant breeding has changed. Different types of molecular markers have been developed and advancement in sequencing technologies has geared crop improvement. To explore the knowledge about molecular markers, several reviews

DNA molecular markers in plant breeding: current status

The School of Biological Sciences (SBS) provides an excellent hub for research in the Life Sciences as well as in interdisciplinary fields. The PhD program at SBS incorporates several areas of study in the field of Biology that provides state-of-the-art opportunity for learning and innovation.

School of Biological Sciences | National Institute of

In view of the above it can be concluded that, without utilization of systematic KM approaches, it is not feasible to attain a sufficient understanding of how the different product quality attributes affect the clinical safety and efficacy of the product.

Knowledge management in the QbD paradigm: manufacturing of

Lipases are a class of enzymes which catalyse the hydrolysis of long chain triglycerides. Microbial lipases are currently receiving much attention with the rapid development of enzyme technology.

Industrial applications of microbial lipases - ScienceDirect

Advanced Science, the newest journal in the Advanced Materials journal family, is an interdisciplinary open

access journal publishing research from all areas of science, including physical, medical and life sciences, as well as engineering.

Blood doping is the practice of boosting the number of red blood cells in the bloodstream in order to enhance athletic performance. Because such blood cells carry oxygen from the lungs to the muscles, a higher concentration in the blood can improve an athlete's aerobic capacity (VO₂ max) and endurance. Many methods of blood doping are ...
