Recently the Food and Agriculture Organisation (FAO) released a report that came up with a novel idea: convince the world population to eat insects to avert mass hunger. In reality it is already possible to feed everyone without the need to eat bugs. What stands in the way is the "market", i.e. capitalism.

"Let them eat insects" - "Food and the future of capitalism"

Capitalism is an economic system based on the private ownership of the means of production and their operation for profit. Characteristics central to capitalism include private property, capital accumulation, wage labor, voluntary exchange, a price system, and competitive markets.
